

LOGEX Income

Transforming Process into Performance

LOGEX Income

Stop churning data. Begin shaping strategy.
Transform process into performance - starting today.

Income monitoring is a critical, but often burdensome task for healthcare organisations. The process is highly data-driven, yet many teams still rely on fragmented systems and manual steps that consume valuable time and increase the risk of errors.

LOGEX Income is a game-changing innovation, that is designed to support and reduce the need for manual intervention and improves data accuracy. An integrated approach enables earlier detection of mismatches between activity and income, reduces the likelihood of commissioner challenges, and supports more effective contract oversight.

Ultimately the goal is simple: safeguard revenue, reduce manual effort, and let your team focus on improving outcomes and financial sustainability.

Value

LOGEX Income supports your process from start to finish, without the complexity of switching between systems

Ongoing transformation in the healthcare system - driven by regulatory changes, NHSE reforms, evolving local guidelines, ICB budget constraints, and shifting reporting format - highlights the need for a robust and adaptable solution.

Flexibility and reliability are essential to maintaining resilient business processes. Our cloud-based platform ensures your system stays aligned with the latest standards and regulations, so you're always prepared for what's next.

LOGEX Income supports your process from start to finish in one single platform

Empowering Your Team with Data-Driven Value

Data loading, prep & validation

Our **integrated Data Platform** gives you full control over data used for income calculations, with advanced functionality for data collection, validation and correction.

1

Grouping & PSS Identification

Our solution provides support at each step of income process. Save time with **configurable and automated data collection** and processing, access the latest logic at your fingertips **via built-in groupers**, and leverage from **automated commissioner allocation** and tagging of activity requiring local prices.

2

3

Pricing & Contracting

Our intuitive rule-based approach is easy to use and provides full transparency and control of your pricing and contracting rules.

This enables your team to **easily make bulk changes** without breaking pricing rules, **directly see the impact** of changes to rules & agreements and **easily validate** if changes have the desired effect.

4

Reporting & Income validation

Strong in-tool analytics empowers you to truly understand your data and anticipate Commissioner challenges.

LOGEX Income offers you the **tools to analyse** your Income data **every step of the way**, with insights on Data quality, Pricing rules, Contract adjustments and Final income output.

5

Reporting & Income validation

LOGEX Income helps you navigate the complexity of many reporting requirements, with automated population of **all ACM and PLCM reporting formats**. This means less time spent on reporting, and more time available to focus on data quality and Income recovery.

Optimising Healthcare

LOGEX is leading the way in healthcare analytics in Europe. By turning data into actionable insights, LOGEX helps decision-makers in healthcare to navigate the sensitive balancing act of affordability, accessibility, and quality of care. With an international team of over 400 experts, we help over 1,000 European healthcare providers make data-driven decisions that level up patient outcomes and that make the best possible care more accessible and more affordable.
